This Office action is in response to applicant's amendment filed on 11 February 2008.

#### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below to restore the body of claim 24 to its previously presented form. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

**In the Claims:**

Rewrite claim 24 as follows:

24. The component of claim 23, wherein the anchoring element is configured to anchor an electrode and the anchoring material is electrically non-conductive.

3. Claims 22-28, 30-48 are allowed.

4. The following is an examiner's statement of reasons for allowance:

- Claims 23-24, 39-40 are allowed because the prior art of record does not teach or suggest, in combination with the other claim limitations, a component that includes an anchoring element that extends through a silicon layer and through an underlying sacrificial layer to a supporting substrate, wherein the anchoring element has a barbed structure that extends in an area of the sacrificial layer to below the silicon layer;
- Claims 22, 25-28, 47-48 are allowed because the prior art of record does not teach or suggest, in combination with the other claim limitations, a component that includes an anchoring element that extends through a silicon layer to a supporting substrate, wherein the anchoring element is configured to anchor an electrode and the anchoring material is electrically non-conductive, and wherein a cap diaphragm is formed on top of the component and the cap diaphragm is mechanically connected to the substrate via the anchoring element; and
- Claims 30-38, 41-46 are allowed because the prior art of record does not teach or suggest, in combination with the other claim limitations, a method for manufacturing a component that includes making a recess that extends through a silicon layer and through an underlying sacrificial layer down to a supporting substrate, filling the recess with an anchoring material to mechanically connect a fixed element of the component to the substrate, wherein the fixed element is produced in the silicon layer, and forming a cap diaphragm on the component.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen W. Smoot whose telephone number is 571-272-1698. The examiner can normally be reached on Monday to Friday from 8:00am to 4:30pm.
